

Feasibility Studies

McLellan provides a full suite of feasibility study services including concept or scoping studies, feasibility studies and bankable feasibility studies for a wide range of clients including private investors, operating companies, investment banks, equity funds and export credit agencies.

Established in 1927, McLellan and Partners has the ability to integrate our expertise in market, technical, commercial and financial aspects to provide our clients with a comprehensive solution for evaluating new business opportunities.

Our expertise ranges from projects for upgrading of existing equipment and infrastructure to investments in new greenfield plants. Despite the often complex technical considerations of a project, our studies are presented so that they can be easily understood by non-technical stakeholders.
